PROFESSIONAL SUMMARY

Master's student in Applied AI for Digital Production Management with practical experience in data analysis, computer vision, production workflows, and quality-oriented documentation. Skilled in Python, Power BI, machine learning, forecasting, model evaluation, and industrial process analysis. Seeking working student or internship opportunities in data analytics, Power BI, production planning, AI/ML, and computer vision.

EDUCATION

11.2025 – Present
Cham, Germany

Master of Engineering in Applied AI for Digital Production Management
Technische Hochschule Deggendorf
Current grade: 1.8 / 5.0
Academic focus: Production Data Management, ERP/MES and IIoT, Machine Learning in Production and Logistics, Machine Vision, Production Planning, Quality, and Sustainability
Master's thesis: Not started

06.2020 – 06.2024
Tirupati, India

Bachelor of Engineering in Electronics and Communication Engineering
Sri Venkateswara Engineering College
Final grade: 2.0
Bachelor's thesis: Malaria Diagnosis with Deep Learning

PROFESSIONAL EXPERIENCE

07.2025 – 08.2025
Regensburg, Germany

Working Student – Production Assistant
Avenir Photonics GmbH & Co. KG

- Supported production and quality workflows for optical measurement devices through component inspection, assembly preparation, calibration support, and final checks.
- Maintained structured documentation, reliable status tracking, and consistent execution of production steps to support quality improvement.
- Assisted with assembly and optical alignment tasks requiring accuracy, fine-motor skills, and attention to technical quality standards.

02.2024 – 06.2024
Bangalore, India

IoT Intern
Verzeo Pvt. Ltd.

- Worked on IoT concepts including sensors, actuators, device communication, and data processing.
- Gained practical exposure to connected devices, embedded system components, and real-world IoT applications.
- Built foundational understanding of IoT workflows relevant to monitoring, automation, and industrial data collection.

KEY TECHNICAL PROJECTS

2025

Window-State Detection using Computer Vision

- Built an end-to-end computer vision workflow for detecting window states using YOLOv8, covering data preparation, training, evaluation, and reporting.
- Translated model results into practical recommendations for environmental monitoring and process automation.

2025

Model Benchmarking for Automated Inspection

- Developed a structured comparison framework to evaluate AI models for automated quality inspection use cases.
- Summarized model trade-offs, evaluation results, and recommendation points for industrial inspection scenarios.

2025

Forecasting for Business Planning

- Applied forecasting methods such as Prophet and ARIMA to support capacity planning and data-based decision-making.
- Compared modelling approaches and translated results into planning insights, KPI impact, and business-oriented actions.

2025

Future-Proofing European Production

- Analysed digitalization, energy efficiency, automation, and Industry 4.0/5.0 trends for long-term production planning.
- Developed scenario-based roadmap priorities for future manufacturing transformation.

2024

Malaria Diagnosis with Deep Learning

- Implemented a CNN-based image classification workflow including preprocessing, model training, validation, and performance tracking.
- Reported model performance using accuracy, precision, recall, and F1-score with supporting error analysis.

TECHNICAL SKILLS

Programming: Python, C, Git/GitHub, VS Code

AI and Data: Pandas, NumPy, scikit-learn, Machine Learning, Computer Vision, YOLOv8, CNNs, Forecasting, Model Evaluation

Analytics and Reporting: Power BI, MS Excel, KPI Reporting, Data Visualization, MS PowerPoint, MS Word

Production and Quality: Production Data Management, Quality Inspection, Process Documentation, ERP/MES Fundamentals, Industrial Process Analysis

Cloud and GenAI: Google Cloud Fundamentals, Gemini-based GenAI Workflows

Professional Strengths: Structured Problem Solving, Documentation, Coordination, Teamwork, Adaptability

COURSES AND CERTIFICATES

Completed
6-month program

Technical Training – SIXPHRASE
Focused on aptitude, problem-solving, communication, and professional skill development.

Completed
Python training

Python Programming – KODNEST
Covered core Python concepts, programming logic, and software development fundamentals.

Currently learning
Online learning

Google Cloud Fundamentals and Gemini-based GenAI Workflows
Learning cloud and generative AI concepts for applied business, data, and production use cases.

LEADERSHIP AND CAMPUS ACTIVITIES

- Awarded first prize for a seminar and technical paper presentation during a college-level technical event.
- Volunteered in student event coordination, supporting event planning, teamwork, and participant management.
- Organized an ideation contest under the Institution's Innovation Council / ECE department to encourage student innovation.
- Participated in a community service project involving team-based social responsibility activities.

LANGUAGES

Telugu: Native/Bilingual

English: Full Professional Proficiency / C1

German: A2 / Elementary

INTERESTS

Cooking | Listening to music | Gardening | Learning new topics | Networking and making new friends

DECLARATION

I affirm that all information provided is true and accurate to the best of my knowledge.
